Our educational philosophy prioritizes emotionally connected patient care and prepares our students for this approach from their first day. They experience frequent face-to-face interaction with patients in clinical settings such as local primary care medical practices during the Foundations of Clinical Medicine Course and clinical clerkships at affiliated hospital sites; La Casita de la Salud, a student-run clinic in the East Harlem neighborhood of Manhattan; and with a standardized patient pool in our Clinical Skills and Simulation Center. These hands-on experiences equip our students with strong interpersonal and clinical foundations upon which to build their careers.

NYMC SCHOOL OF MEDICINE (SOM)

SOM facts

862 STUDENTS
(AS OF FALL 2019)

57% FEMALE
43% MALE

Residency Match 99.5%

SOM Entering Class:
- Undergraduate institutions represented: 103
- Number of applications received: 12,845
- Average MCAT score: 511
- Undergraduate GPA: 3.6

- 15% of SOM students self-reported as part of a group currently underrepresented in medicine.
- SOM students self-reported as members of the following groups:

- 52% White
- 26% Asian
- 9% Hispanic (of any race)
- 6% Black
- <0% American Indian/Native Hawaiian
- 7% Other/Not Specified
NYMC SCHOOL OF MEDICINE’S GRADUATE MEDICAL EDUCATION (GME) PROGRAM prepares medical school graduates for practice in a medical specialty or subspecialty. With approximately 330 residents and fellows in 17 programs, NYMC GME programs provide experienced, board certified faculty; clinical experience; and the academic support and resources required to train residents to become competent, board certified physicians in their specialty.

NYMC is taking the lead with its partner hospitals in founding and promoting Shomer Shabbos residency training positions. These slots allow accommodation of Jewish observance with the understanding that primacy is always given to the needs of our patients.
