

Accessing the New York Medical College WiFi Network:

- 1) To connect to the WiFi, select the SSID called **NYMedical-Privatel**.
- 2) Once you connect, your device should bring up the splash page similar to the image below.
- 3) On the splash page click “Login with Touro SAML”. Note, you must review and accept the terms of service in order for this link to work.
- 4) Once you are logged in, you may need to disconnect from the WiFi and connect again to the same SSID. As an alternative, you can also opt to restart your device after entering your credentials. Once you connect again, you should be able to connect to the internet. This is only required once per device. If you receive an error “Invalid Credentials” please contact the help.touro.edu | help@touro.edu | 1-844-868-7666

If you have any problems accessing this network please contact Privatel Inc. at service@privatelinc.com or (732) 974-1502

Please Note: Once you accept the Terms and Conditions and click the “Login with Touro SAML” this screen will appear for you to enter your Touro One credentials.
