

Register a device to your account that does not have a browser.

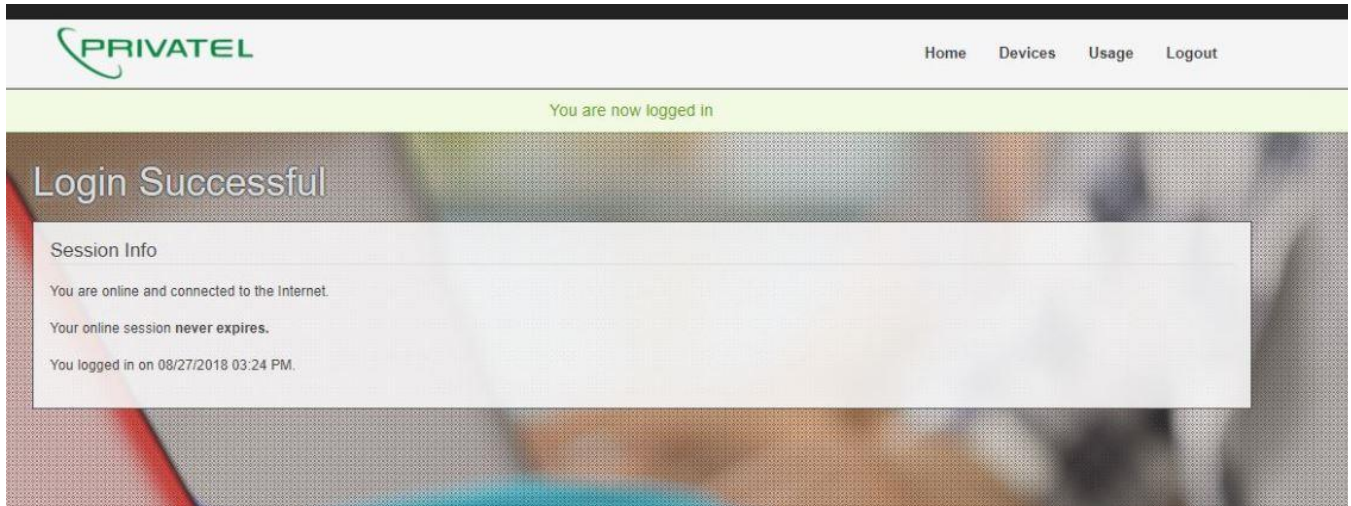

The New York Medical College WiFi network requires registration of all devices connected to the network. Use this procedure to register a device that does not have a browser, for example a video game console, an internet TV device or a Google Alexa.

- 1) To connect to the WiFi, select the SSID called **NYMedical-Private**
- 2) Depending on your Resident Hall location, please use the appropriate link below to access your personal portal. See picture below.

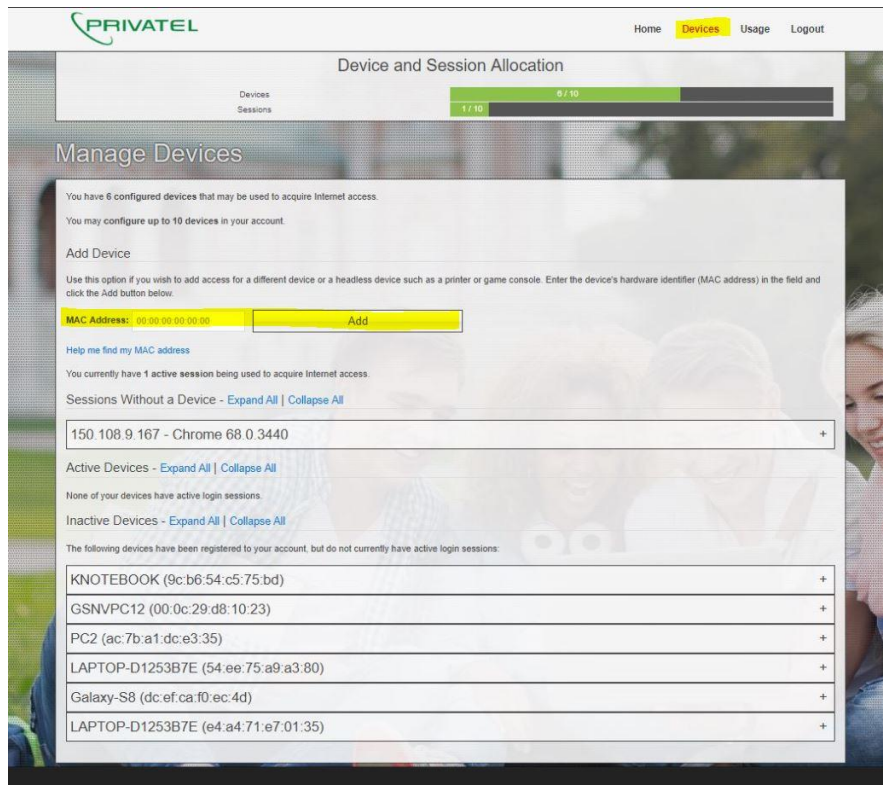

<https://nymedical.private-wifi.com>

A screenshot of a web portal for PrivateTel/TOURO. The page has a white header with the PrivateTel logo on the left and a "Home" link on the right. The main content area has a background image of a person's hands typing on a laptop. Overlaid on this is a white login form. On the left side of the form, there is a text box with instructions: "Please login to the right with your NY Medical / TOURO credentials. If you receive an error 'Invalid Credentials' above, please contact the NY Medical helpdesk. If you experience any other difficulty connecting to the network contact PrivateTel Inc at (732) 974-1502 or email service@privatelinc.com". On the right side, there is a "Login with Touro SAML" button and a "Guest Access" section. The "Guest Access" section includes a checkbox for "I accept Terms of Service", a text input for "Supply a valid mobile phone number below to receive your Internet access token via SMS.", and several input fields for "first name...", "last name...", "email...", and "mobile phone...". There is also a dropdown menu for "-- Choose Mobile Carrier --" and another "I accept Terms of Service" checkbox. A "Continue" button is at the bottom of the form.

- 3) On the splash page enter your TOURO account or Active Directory credentials under the LDAP Login just as you did to access the WiFi on your other device.
- 4) If your login credentials are accepted, you should see the following. If you receive an error "Invalid Credentials" please contact the help.touro.edu | help@touro.edu | 1-844-868-7666

- 5) To add a device to your account, simply click on “Device” at the top right of the screen. The following screen should appear.

- 6) Enter the MAC address of the device you want to add to your account and click add.
- 7) Your device is now ready to be used. It may require a power cycle if you are not able to access the internet after a few minutes.

If you have any problems accessing this network please contact Privatel Inc.
service@privatelinc.com or (732) 974-1502
